## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-28 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 91/16376.

WO'376 discloses a packaging film with good clinging properties comprising a terpolymer of at least 50% of ethylene, 2-20% by weight of an unsaturated monocarboxylic acid having 3-8 carbon atoms and 2-20% of a moiety derived from at least one alkyl acrylate, alkyl methacrylate and mixtures thereof, wherein alkyl radical contains 2-12 carbon atoms (see page 3, lines 25-34). The low level of sorbitan fatty acid ester can be added to improve antifogging properties (see page 7, lines 9-19). This **expressly** meets all the limitations of the instant claims 1-4 and 12-15.

WO'376 further teaches that the acid groups of the polymer of the acid containing moiety are neutralized 0-10% by at least one metal ion (see page 3, line 35 and page 4, line 1). Suitable metals are metals of Group I, II and III, out of which Zinc and Sodium are most preferable. (see page 6, lines 1-13). This **expressly** meets the limitations of the instant claims 7, 8, 24.

Art Unit: 1713

With regard to claims 5, 10, 16-22, 25 and 27, which are concerned with the stretching properties of the films, since the films of WO'376 are identical in their chemical make-up to the instantly claimed films and are made by essentially the same method as instantly claimed films, such properties inherently present in the films of WO'376. Products of identical chemical composition cannot have mutually exclusive properties. A chemical composition and its properties **are inseparable**. Therefore if the prior art teaches the identical chemical structure, the properties and characteristics applicant discloses and/or claims are necessarily present. *In re Spada*, 911 F.2d 705,709,15 USPQ2d 1655,1658 (Fed. Cir. 1990). Therefore the limitations of claims 5, 10, 16-22, 25 and 27 are inherently met by WO'376.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 6, 9, 11, 23, 26 and 28 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over WO'376.

The above claims are **product-by-process** claims, wherein the limitation not disclosed in WO'376 is that the film is made by a T-die method. However, in terms of the chemical

Art Unit: 1713

components and their amounts in a terpolymer the films of WO'376 and the instant claims are identical, which was addressed in the 102 (b) rejection. Furthermore, both films are prepared by an extrusion method, the non-specified difference is the shape of die. Applicants are reminded that patentability of the product is based on the product formed –not by method by which it was produced, *In re Thorpe*, 777 F 2d 695, 227, USPQ 964 (Fed. Cir 1985)

Furthermore, because of the nature of product-by process claims, the Examiner cannot ordinarily focus on the precise difference between the claimed product and the disclosed product. It is then Applicants' burden to prove that an unobvious difference exists. See *In re Marosi*, 218 USPQ 289, 292-293 (CAFC 1983).

See also footnote 11 O.G. Notice 1162 59-61, wherein a 35 USC 102/103 rejection is authorized in the case of product-by-process claims because the exact identity of the claimed product or the prior art product cannot be determined by the Examiner.

*In re Brown*, 173 USPQ 685 (CCPA 1972), the Court of Customs and Patent Appeals (CCPA) explicitly approved the 102/103 rejection of a product-by-process claim over a reference which showed a product which appeared to be identical or only slightly different from the claimed product.
